

Seconds count... it could save a life!!

There are many homes in our town that do not have any numbers or only have small numbers marking their address. It can be extremely difficult for emergency services to find your home or your neighbors, if it is not marked by big reflective numbers.

Locating an address during an emergency is not something most people think about when putting a house number on their home or mailbox. Drive around and see to how your neighbors have done it.

Imagine that its 2am and raining and the ambulance is trying to locate your home. To have a large reflective plate with 3" reflective numbers will ensure that they locate you without any issue.

Do you shovel out around your mailbox in the winter? Most people don't! We move just enough snow to open the front. We will put your address on the face of your mailbox to help us find you even with many feet of snow on the ground.

Remember its not about aesthetics is about your safety. Help us find you and your neighbor when seconds count!

HELP US FIND YOU

**Merrimac Fire Department
Hose Company No. 1**
